| A List of the Fungi detected in Cloyne and its Vicinity, in 1852.<br>By W. T. ALEXANDER, Esq., Surgeon R.N.                                                                                                                                                                                                                                                                                         | 729   |
| Notes from North Wales, in August, 1852. By A. FRED SHIPLEY and R. REYNOLDS, Esqs.                                                                                                                                                                                                                                                                                                                  | 734   |
| On the Fertility of certain Hybrids. By T. BELL SALTER, Esq., M.D., F.L.S.                                                                                                                                                                                                                                                                                                                          | 737   |
| Notes of a Few Days' Visit to Lynmouth, Devonshire. By THOMAS CLARK, Esq.                                                                                                                                                                                                                                                                                                                           | 742   |
| MS. Notes and Additions in a Copy of Ray's 'Catalogus Plantarum Angliæ,' &c. Communicated by W. PAMPLIN, Esq.                                                                                                                                                                                                                                                                                       | 744   |
| Extracts from the 'Report on Substances Used as Food,' exhibited at the Crystal Palace, in 1851. Reported by J. D. HOOKER, M.D., F.R.S., &c.                                                                                                                                                                                                                                                        | 746   |
| Three Days' Walk in the New Forest, together with a few additional Localities to Dr. Bromfield's Hampshire Flora. By EDWARD T. BENNETT, Esq.                                                                                                                                                                                                                                                        | 753   |
| PROCEEDINGS OF SOCIETIES, &c. :— <i>The Phytologist Club</i> :<br>Hydnum coralloides, <i>Scop.</i> , near Burton-on-Trent ; Spinulose Section of <i>Lastreas</i> ; Cowslip in Flower in October ;<br><i>Melampyrum pratense</i> γ., <i>Brit. Fl.</i> ; <i>Cyperus fuscus</i> in Yorkshire ; <i>Collomia grandiflora</i> in Yorkshire ; Errata in a previous Number ; <i>Lastrea recurva</i> in Mull | 756   |

TO CORRESPONDENTS.—We are indebted to an unknown correspondent for an extremely fine plant of *Trichomanes speciosum*. The only information given in the note accompanying the fern, is that the plant was in considerable abundance, and not in the old stations. We always rejoice to hear of its being found in new localities. May it long retain its place in the Irish Flora !

Much interesting matter unavoidably stands over.

*In three volumes. — Price 10s. 6d. each.*

## CYBELE BRITANNICA ;

OR

BRITISH PLANTS AND THEIR GEOGRAPHICAL RELATIONS.

BY

HEWETT COTTRELL WATSON.

N.B.—The Distribution of each Species, native or introduced, is now completed, according to existing information on the subject, at the beginning of 1852.

LONDON : LONGMAN AND CO.

*Just Published, Price 10s. 6d., the Third Fasciculus, comprising Nos. 72—106, of*

**L**ICHENES BRITANNICI EXSICCATI, or DRIED SPECIMENS of the LICHENS of GREAT BRITAIN. By the Rev. W. A. LEIGHTON, B.A., F.B.S.E.

As the number of copies prepared is limited, persons desirous of possessing the work are requested to make early application to the Editor, Shrewsbury, accompanied with a Post-Office Order for the price, and plain directions as to the transmission of the work.

A few copies of Fasciculus I. and II., price 10s. 6d. each, may still be had, on application as above.

Sold also, by Commission, by WILLIAM PAMPLIN, Botanical Bookseller, 45, Frith Street, Soho, London.
